cyberREN

FDA Approval
510(k) #K970989

cyberREN Clinical

A Complete Renal System

providing a large suite of features for all clinical areas involved in renal care.

Supports all Treatment Modalities

pre-dialysis, hemodialysis, PD and transplant follow-up. Pioneered support for Slow Nocturnal Home Dialysis (SNHD), i.e. remote treatment data capture and online monitoring.

HIPAA Compliant

full regulatory support.

Price-Competitive

a powerful and comprehensive software package, but priced with the budgets of all sizes of operations in mind.

Extremely User Friendly

short learning curve, voice activated charting.

Flexible and Modifiable

users have a great deal of flexibility in defining charting options and determining how cyberREN supports workflows within their own clinic.

Dialysis Machine Vendor Neutral

supports direct communications with all brands of dialysis machines, with either serial, wireless or network interfaces.

Data Interfaces / Multiple Site Networking

remote dialysis monitoring, interfacing to ancillary clinical systems such as lab, billing, ADT, radiology, pharmacy and others.
